

First circular

February 11, 2020

Dear colleagues,

The organizing committee of the **XII Brazilian Vertebrate Paleontology Symposium** is glad to inform that the event will be held from **October 19th to October 23rd, 2020** in the municipality of João do Polêsine, **Quarta Colônia** region of the Rio Grande do Sul state, Brazil. Located at the central region of the state, easily accessed from the city of **Santa Maria**, the Quarta Colônia region is the Brazilian cradle of dinosaurs. The region historically yielded a spectacular fossil record, encompassing a large portion of the **Triassic** period.

As a means to enrich the scientific debate during the event, we encourage the submission of proposals by the attendants, of workshops, round-table discussions, exhibits and other activities, by the contact e-mail **contato@sbpv.rocks**.

Follow our newsletter at the event's official website (**www.sbpv.rocks**).

We await you at the Quarta Colônia!

Organizing Committee - XII SBPV
